

# STERLING NH Choice™

## CONTENT LABEL

Sterling Planet is participating in National Grid's **GreenUp** service, bringing you the opportunity to enroll in a program that supports environmentally preferable power generated from wind and small hydroelectric facilities. **Sterling NH Choice™** allows power customers to be champions for renewable resources that produce significantly less pollution than conventional electricity sources. When you sign up for **Sterling NH Choice™**, you stay with National Grid as your electricity provider, but pay a small additional monthly charge that supports the generation of cleaner power from wind and water.

Consumers of all kinds – corporations, colleges, non-profits, government agencies and individual consumers - purchase renewable energy to reduce the environmental impact of electricity use, help decrease dependence on foreign fuels, increase energy security, and support sustainable economic development. Involvement is simple and inexpensive.

RENEWABLE ENERGY RESOURCES		GENERATION LOCATION
	25% New Wind <sup>1</sup>	New England
	75% Small Hydro	New England
<b>Total Renewables</b>	100%	New England

<sup>1</sup> New Renewables come from generation facilities that first began commercial operation on or after January 1, 1997.

**Sterling NH Choice™** customers who select the 100% signup level option will support cleaner renewable energy for 100% of monthly use. Those who select the 50% signup level will support cleaner renewable energy for 50% of their monthly use.

For comparison, the current average mix of energy sources supplying New England is 36% natural gas, 26% nuclear, 15% coal, 10% oil, 6% hydro, 5% biomass, and 2% other sources.
