Re : OASIS Posting – National Grid Affiliate

Schedule 25 of the ISO-NE tariff requires Interconnecting Transmission Owners to post on OASIS an advance notice of its intent to participate in a Scoping Meeting with an Interconnection Customer that is also an Affiliate. Accordingly, National Grid is posting this notice regarding a scoping meeting which took place on November 16, 2016 for QP619 Alps to Berkshire AC ETU with an affiliate, Grid America Holdings Inc., ISO-NE, NYISO, VELCO, and Eversource.

Due to an administrative oversight, National Grid did not post this notice in advance of the November 16, 2016 meeting; however, when the Company became aware of the oversight it promptly made this posting.
